Vaibhav Chopra

Full Stack Web Developer, Projects Lead at ISTE, Senior Core Member at STC-VIT

A self motivated and energetic tech enthusiast who loves to explore various technologies, create something new and different, and tries to solve real problems using his technical and analytical skills. Aiming to be a part of an innovative environment where I can use my interpersonal skills to accomplish organisational goals.

EDUCATION

B.Tech. CSE

Vellore Institute of Technology, Vellore

07/2019 - Present

Current CGPA - 9.72/10 (2nd year student)

WORK EXPERIENCE

Full Stack Web Developer and Solutions Architect

Prisha Insurance Brokers Pvt. Ltd.

08/2020 - 10/2020

Prisha Insurance Brokers is among the top five insurance brokers in India with decades of experience in corporate insurance.

- Developed the website and backend infrastructure with a team of dedicated individuals.
- Spearheaded the use of cutting edge technologies like Webpack, Typescript and Google Firebase.
- Integrated analytics and performed funnel analysis for generating better leads for the company.

React JS Developer Internship

Applutions Softech Pvt. Ltd.

06/2020 - 09/2020

Applutions is a leading provider of bespoke tech solutions. Specialising in AI, Blockchain, App & Web Development.

- Worked on several full-stack applications for international clients.
- Improved upon and restructured the codebase of applications to enhance performance and functionality.
- Managed several deployments of various frontend and backend applications with the Softech team.

PERSONAL PROJECTS

Smriti - Alzheimer's Patient Assistant App (11/2020 - Present)

- Using raspberry pi based special glasses that I developed, patients can identify acquaintances and family members. They can also keep track of their reminders and schedules all in one place using the app. (Github: git.io/Jkyv2)

Emoji-UUID - An Initiative for Human Friendly Key Identifiers (10/2020 - 11/2020)

- Published my own NPM package and managed CI/CD using Github actions and azure deployment center. Also implemented a typescript API around the package and wrote unit tests using jest and supertest. (Github: git.io/JkyTQ)

Rozgar - A Post Covid-19 Employment App (07/2020 - 08/2020)

- Rozgar brings employment to the poorest of the poor who don't have LinkedIn. Workers can use 2G Phones to register themselves on a database by sending text messages. I managed the DB and the API for the application. (Github : git.io/JkyvX)

Hackportal - Hackathon Teammate Finder (07/2020 - 09/2020)

- A platform that allows university freshmen with no teams for hackathons to seek teammates to work with them and build products. Users can find people to recruit and filter by required skills and expertise. (Github: git.io/JkyTh)

GitTix - Ticket buying and selling Microservices based app (11/2020 - 11/2020)

- A NextJS and Express based microservices app with Jest testing. I used a NATs event bus inside a kubernetes cluster. I used Strapi to handle credit card payments. (Github: git.io/Jkyvi)

ACHIEVEMENTS

Hackout by Headout Winner - 3rd position worldwide (11/2020 - Present)
